Business & Residential Plans

# Diodecom H.S.I.

You asked for it and Diode Telecom heard you! Diode Telecom, your hometown communications provider now offers High Speed Internet.

We employ state of the art cable modem technology to provide high speed data transmission over our new Cable TV (CATV) infrastructure. In other words, instead of connecting to the Internet via the telephone line or some other means, Diodecom H.S. I. allows you to connect through the same coaxial cable that provides Diode Telecom cable services to your home or business.

The advantages of high speed internet via cable vs. phone modems are:

- Higher transmission speeds
- Always on, Always connected
- No dial-up or busy signals
- Multiple users including full TV use
- No disconnection due to phone line or modem problems
- Does not tie up your phone lines
- We are locally owned and operated!!!

Remember how cable changed the way you watched TV, wait until you see what Diodecom H.S.I. does for the Internet!

## Speed & Pricing

<u>Package</u>	<u>Download</u>	<u>Upload</u>	<u>Price</u>
